

## INRIX Global Traffic Scorecard

The INRIX Global Traffic Scorecard is the largest study of its kind. We analyzed and ranked the impact of traffic congestion in:  
5 continents | 38 countries | 1,064 cities

### Welcome to the INRIX Global Traffic Scorecard

Population and economic growth alongside continued urbanization are the root causes of congestion. As cities strive to update or expand aging infrastructure, the application of big data and analytics to understand and help combat traffic congestion is crucial to the health and development of our cities. The INRIX 2016 Global Traffic Scorecard uses a new methodology to provide a data-rich evaluation of urban travel, traffic health and vibrancy for over 1,000 cities around the world.

Use the interactive tool below to see where your city ranks and how it performed.

**A big study using big data**  
The INRIX 2016 Traffic Scorecard analyzed congestion in 1,064 cities in 38 countries – the largest ever study of its kind.

**Clenching the wheel**  
Los Angeles commuters spent over 100 hours a year in traffic jams in 2016 – more than any other city in the world.
